

# United States Coast Guard

Transportation Officer

Permanent Change of Station

The USCG is transitioning to a new type of PCS Orders. This presentation has been created to assist in the creation of Transportation Shipments and Storage.

Direct Access Orders are still required; however, the document numbers have phased out and are now part of the mLINQS authorization. The Authorizations produced by mLINQS must contain the **Order Number**, the **POET** (accounting info), and the **Transportation Account Code (TAC)**. **The TAC will still show on the Direct Access Orders, even though it doesn't currently show up on mLINQS orders.**

If the member arrives without **those three specific required elements**, they should be referred back to their Approving Official at the unit level.
